

Need for Workshop

Character oriented education that instills human values and ethics in one's psyche is called "Value based education". The subject that enables us to understand 'what is valuable' for human happiness is called value education. Value education is important to help everyone in improving the value system that he/she holds and puts it to use. Value education enables us to understand our needs and visualize our goals correctly and also helps to remove our confusions and contradiction; and hence ensure harmony at all levels. It also helps to rightly utilize the technological innovations.

The need for value based education has been repeatedly highlighted by various commissions and experts committees on education (Dr. Radhakrishnan, Dr. Kothari, UNESCO declaration on service to society and so on). Academic bodies in the country have been directing universities to take necessary steps to sensitize students with human rights and human values. "Ethics, Integrity and Aptitude" has been introduced as a compulsory paper (General Studies Paper IV) in the Civil Services (Main) Exam since 2013. The AICTE review committee has made a strong recommendation to the Government in 2014 regarding humanizing education.

It is the responsibility of educators to make genuine efforts to resolve these issues and develop education that enables the students to live a fulfilling life in harmony with oneself, with family, society and nature. It should facilitate the development of human conduct and the competence to contribute to an undivided society and universal human order.
